

Rohan Yadav

Syracuse, NY • (315)-395-3313 • rohany395@gmail.com • linkedin.com/in/rohan-yadav5/ • github.com/rohany395

Full-stack software engineer with 4+ years shipping production web applications for millions of users. Strong across React/TypeScript frontends, Python and Node backends, SQL, and cloud infrastructure. Proven track record of owning features end to end and delivering measurable user impact across consumer-facing and internal products.

EDUCATION

M.S. Information Systems | Syracuse University | GPA:3.86

May 2026

WORK EXPERIENCE

Graduate Research Assistant | Syracuse University

Aug 2025 – Mar 2026

- Led a 4-member team to design and deliver an Android application using Java on ATAK, securing funds and extending school-stakeholder partnership by additional 2 years.
- Integrated an LLM pipeline to process unstructured data and surface actionable insights, improving user workflow.
- Deployed a containerized ATAK Server on an Azure with Docker, SSL and networking rules for secure client connectivity.
- Refactored **60%** of the legacy codebase to improve readability, maintainability, and adherence to coding standards.

Software Engineer | WebMD

Apr 2022 – Dec 2024

- Developed and launched a Vue.js patient-prep UI that contributed to closing a \$9M deal within one month of release. [Link](#)
- Shipped interactive content features including quizzes, slideshows, articles using component-based TypeScript/Vue.js architecture serving millions of monthly users. [Link](#)
- Reduced page load times by 50% through lazy loading and optimization of Vue.js components across high traffic application. [Link](#)
- Designed and maintained SQL DB and backend for a content packaging tool enabling PMs to author and assemble reusable content blocks into production webpages.
- Led migration of 20+ production applications from Vue 2 to Vue 3, managing backward compatibility, writing automated tests, and conducting code reviews to ensure zero downtime.

Trainee Software Engineer | WebMD

Nov 2021 - Mar 2022

- Built and deployed an internal web application for company-wide rewards and recognition used by ~100 employees.
- Extended Backstage an open source developer portal, using React to streamline repository management.
- Integrated RESTful APIs across front-end applications, collaborating with backend teams on data-driven UI features.

PROJECTS

Neuro Cue | Python, Multimodal AI, Inference pipeline, React | [neuro-cue.vercel.app/](#)

- Deployed Meta's TRIBE v2 multimodal foundation model on Hugging Face (ZeroGPU); forked the model to patch its torch version pin, restoring deployment after Hugging Face's GPU upgrade to Blackwell broke the upstream dependency constraints.
- Built a React + Vite frontend with anatomical region overlay, an interactive 3D Plotly brain heatmap, and a Recharts activation chart for surfacing relevant information quickly.

Clinical Case Study Generator | LLM, RAG, Python | [neurogenic-case-generator.streamlit.app/](#)

- Developed a multi agent architecture with 3 specialized LLM agents for case generation, clinical documentation, treatment planning using OpenAI and Anthropic models, generating comprehensive case studies for graduate students.
- Reduced case generation time by 90% by implementing RAG and Prompt engineering for generating case of desired consistency.

LEADERSHIP

President | Worldwide Innovation Technology

- Led research initiatives and mentored junior engineers of the student technology club at Syracuse University.

TECHNICAL SKILLS

- **Languages/ Frameworks:** React, TypeScript, Python , JavaScript, VueJS, SQL, NodeJS, Java, FastAPI, HTML/CSS, REST APIs, GraphQL
- **Infrastructure:** AWS, Git, Docker, Kubernetes, Postman, Jest, Cypress, Jira, Postgres, Tableau
- **AI tooling:** RAG, agents, Evals, LLM, PyTorch, Fine-tuning, Prompt Engineering.
